

A broad community of contributors and a dedicated team of professional staff with a budget of up to \$250,000,000

Cutting-Edge Mining Hardware

Cryptocurrency mining is most profitable when done with top-of-the-line, taskspecific hardware.

Low-Cost Electricity and Stable Energy Supply

We have access to the low-cost, stable power supply we need to make mining profitable. Facilities like mining centers receive government tax incentives that support such activities.

Secure and Reliable Facilities

Each AARNAV mining center will be located near a reliable source of electricity. Our first center will have 25,000 m²+ of floor space and can accommodate up to 4,000 mining units with a total computing capacity of 200,000,000 Ksol/s. A mining center with such a configuration is capable of generating ±23 bitcoin per day.

Highly-Experienced Team

It takes a team of engineers, security, construction experts, and software developers to run mining operations on this scale. With more than two decades of experience in data center construction and management around the world, we have what it takes to make Aarnav profitable for the entire community.

The Aarnav "Cushion Effect":

An Alternative to Bitcoin Speculation

Aarnav is not aimed at speculation in bitcoin (BTC). It is aimed at mining Equihash algorithm. Because Aarnav is mining Cryptocurrency and gets payout in Bitcoin, ultimately converted in Fiat currency, this can serve to "cushion" fluctuations in bitcoin exchange rates.

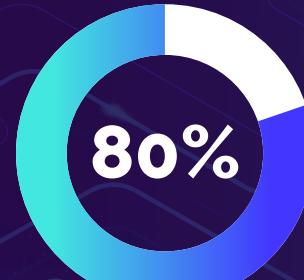

● Next-Level Community Mining

The basis of the Aarnav business model is the ARM Token, which represents membership in the AARNAV Community and a share in the output of the best crowd-funded Cryptocurrency mining center that money can buy.

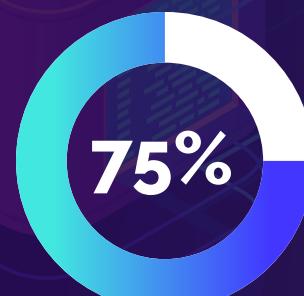

→ \$20 Million
1st Phase

→ \$250,000,000
Hard Cap

→ 157%
Expected Annual ROI

Hard Ware Purchase and Installation Delivery, Import Duties

Use of Crowdsale Proceeds

80 percent of funds raised during the Crowdsale will be used to set up Aarnav mining facilities, including purchase of mining hardware, transport, and duties

12 percent reserve fund for AARNAV INC. (for unforeseen circumstances)

8 percent shall be used to cover administrative expenses, including incorporation and legal support. Research and development.

Output Distribution

75 percent of net earnings (total gross earnings minus electricity, facility, and maintenance costs, including maintenance staff) will be distributed Quarterly to all ARM Token Holders.

25 percent of net output will be reinvested into new mining equipment to keep each mining centre operating at peak efficiency

Public

Token Allocation

Public 80 percent of all Aarnav Tokens shall be allocated to contributing participants in the Aarnav Community

10 percent as sole remuneration for the Founders (Management) Team,

7 percent for Research and Development

3 percent for the Vulnerabilities Program
